

Vaibhav Singh

Post Graduate Programme in Management (PGP) 2017-2019

Gold Medallist – Best All Round Performance

Vaibhav was awarded the prestigious Aditya Birla scholarship in his first year at IIMB. The scholarship was renewed in the second year based on his academic and co-curricular performance at IIMB.

He captained the Lawn Tennis team in his second year and tried his hand at multiple sports at IIMB, winning 10 medals (four gold, five silver and one bronze) in various inter and intra-IIM competitions. He initiated the Run2Educate 2018 fundraiser campaign for the wellbeing of children with disabilities.

As head of the Venture Capital Society at IIMB, he organized events which attracted participation from the top six B-schools of the country and allowed students to emulate the lives of PE & VC professionals. He helped two NSRCEL-incubated start-ups raise angel investment by mentoring them on investment pitch decks and their business model.

As Senior Coordinator of the Consulting Club at IIMB, he led multiple industry live projects and conducted preparatory case workshop sessions for both summer internships and final placements.

In his capacity as Floor Coordinator, during the PGP1 summer internship process, he contributed towards 100% placement of the batch in record time.

With a strong technology background, he signed up for the PGP at IIMB to learn what makes a business succeed or fail. “The past two years have been enriching in this regard, as I got opportunities to showcase and hone my leadership skills and business acumen,” he says. Being involved with numerous business conclaves, knowledge sessions and student competitions provided him the exposure to real-world business challenges faced by organizations. “Great friends, emotionally charged moments during various sporting competitions, and the fun activities on this beautiful campus make my time here special,” says Vaibhav.

The 31-year-old says that he aspires to become a CleanTech expert. His master’s degree at ETH Zurich equipped him with strong technical knowhow in the space, and IIMB empowered him with skillsets needed for large-scale technology commercialization. He is currently collaborating with a Swiss firm for deployment of electric vehicle charging infrastructure. Given his inclination towards sport, he also sees himself playing a part in the development of sports and fitness culture in India.

Vaibhav says his upbringing taught him the value of hard work and discipline. His father is the Electricity Ombudsman for Uttar Pradesh and his brother (an IIMC gold medallist) works in the financial sector in Mumbai.
